GNS Mekanik 1981 yılında üretim hayatına başlamıştır. GNS Mekanik 1994 yılında başladığı toz toplama sistemi imalatıyla kısa zamanda hizmet ettiği sektörün güvenini kazanmıştır. Kalite, güven ve hizmetin adresi. 36 yıllık tecrübemizle Mobilya sektörüne hizmet sunmaktan gurur duyuyoruz.

GNS Mekanik ilk olarak taş motoru imal etmiş, daha sonra profil kesme makinesi, mozaik silme makinesi, parke silme makinesi gibi ürünleri bünyesinde üreterek TÜRK sanayisine hizmet vermiştir. GNS Mekanik 1994 yılında başladığı toz toplama sistemi imalatıyla kısa zamanda hizmet ettiği sektörün güvenini kazanmıştır.

Mobilya sektörünün toz emme ihtiyacını dikkate alan firmamız, gerekli fizibilite çalışmalarının ardından toz emme imalatına başlamıştır. O günden bu güne sadece toz emme ve filtreleme sistemleriyle meşgul olmuş, bu alanda kendini geliştirmiş ve yenilemiştir. GNS Mekanik, Metal Toz ve Talaş Emme Sistemlerinin imalatına seyyar tip 1600m³/h normal ve zemin temizlemeli, 5000m³/h ve 7500m³/h yanları açık ürünlerle başlamıştır. Kısa zaman sonra ihtiyaca göre istenilen kapasitede toz emme sistemleri üretmiştir. Diğer ürünlerinin dışında toz toplama siloları ve hava tahliye siklonları gelmektedir. GNS Mekanik, mobilya ve ahşap sektörünün yanında metal ve plastik sektörünün de toz toplama ihtiyacını karşılamaktadır.

GNS Mekanik, kaliteyi ucuza sunma ilkesini kendine ilke edinmiştir. Bu ilke doğrultusunda sürekli makine parkurunu geliştirmiştir ve üretimini hızlandırmıştır..

We feel proud for offering our experience to you as a service.

GNS Mechanical started its production life in 1981. GNS Mechanical has gained the trust of the sector it serves in a short time with the production of dust collection system it started in 1994. The address of quality, trust and service. We are proud to serve the furniture industry with our 36 years of experience. GNS Mechanical first manufactured stone engine, then served the Turkish industry by producing products such as profile cutting machine, mosaic wiping machine, parquet wiping machine. GNS Mechanical has gained the trust of the sector it serves in a short time with the production of dust collection system it started in 1994.

Our company, which takes into account the dust extraction need of the furniture sector, has started the production of dust extraction after the necessary feasibility studies. Since then, it has only been busy with dust suction and filtering systems, it has improved and renewed itself in this field. GNS Mechanical started the production of Metal Dust and Chip Extraction Systems with mobile type 1600m³/h normal and floor cleaning, 5000m³/h and 7500m³/h open side products. After a short time, it produced dust extraction systems in the desired capacity according to the needs. Apart from its other products, there are dust collection silos and air discharge cyclones.

GNS Mechanical meets the dust collection needs of the metal and plastic industry as well as the furniture and wood industry.

GNS Mechanical has adopted the principle of offering quality cheaply. In line with this principle, it has continuously developed its machine park and accelerated its production.

- Toz toplama siloları; toz toplama ve filtrelemenin yanı sıra depolama yapabilen toz toplama sistemleridir.
- Depolanan talaş ister kamyon'a boşaltılır, istenirse de katı yakıt kazanlarında yakıt olarak kullanılabilir.
- Depolanan talaşın sıkışmaması ve köprü oluşturmaması için karıştırıcı kullanılır.
- Depolanan talaş boşaltma ağzına helezon konveyör ile taşınır.
- Boşaltma ağzında hava kilidi bulunmaktadır.
- Hava kilidi boşaltma esnasında tozun çevreye yayılmasını önler.
- Torex ile talaş dolum seviyesi otomatik kontrol altında tutulmaktadır.
- Modüler olarak imal edilmektedir.
- Elektrostatik toz boyası ile boyanmaktadır.

- Dust silos; are the dust collection systems which can store the dust besides dust collection and filtration.
- The dust and chips stored either can be emptied in a truck or solid fuel boiler.
- A mixer is used for the stored dust and chips not to be pressed and not to create a layer
- The dust and chips stored is transferred to discharge outlet with worm screw conveyor .
- There is a rotary valve in discharge outlet.
- Rotary valve prevents the dust and chips to scatter out during discharge
- Dust storage level is kept under control automatically with torex
- The silos are manufactured modular.
- The silos are painted with electrostatic powder dye.

Sprial Boru Ve Bağlantı Elemanları / Sprial Duct and Fittings

$\varnothing 80\text{mm}$ 'den $\varnothing 600\text{mm}$ 'ye kadar spiral boru imalatı yapılmaktadır. $\varnothing 125\text{mm}$ 'den $\varnothing 600\text{mm}$ 'ye kadar çatal, dirsek ve redüksiyon imalatı yapılmaktadır.

Uygulamalarımızda, spiral borular kullanılır ve birleştiriciler flanşlar ile yapılır. Bu sayede borunun iç kısmında pürüzsüz yüzey elde edilir ve pvc gibi uzun lifli parçalarla tikanmasının önüne geçirilir.

Spiral duct is manufactured from $\varnothing 80\text{mm}$ to $\varnothing 600\text{mm}$. Elbows, laterals and reducers are manufactured from $\varnothing 125\text{mm}$ to $\varnothing 600\text{mm}$.

Spiral ducts are used and ducts are connected via flanges in our applications. Thus smooth surface is provided inside the duct and the ducts are prevented by being blocked with long stringed chips such as pvc.

ELLE SÜRGÜLÜ KLAPE HAND SLIDING CLACK

$\varnothing 80\text{mm}$ 'den $\varnothing 600\text{mm}$ 'ye kadar sürgülü ve pnömatik klapa imalatı yapılmaktadır.

Hand sliding and pneumatic sliding clacks are manufactured from $\varnothing 80\text{mm}$ to $\varnothing 600\text{mm}$.

PARÇA TUTUCU PART SEPARATOR

Pvc ve tahta parçası vb. radyal fana gitmesi istenilmeyen taneleri ayıran parçadır. Farklı ölçülerde imalatı yapılmaktadır.

The part separates the pieces such as pvc and wooden parts which are undesired to pass towards the fan. Part separators are manufactured in different sizes.
